Shopping Web Page

You have to design a shopping web page with your own style and following main features:

- There must be at least 10 items in your store.
- Customer can define the amount of each item.
- Display the number of selected items in the cart.
- Create a "Check Out button" in order to show a summary of selected items (amount and total price) in a pop-up window.

You may add another function in order to make your shop more interesting and user-friendly that will be considered as a bonus score.

Design Rules

1. Design base on the Bootstrap components and layout.
2. Support a responsive design.
3. The web page need to be suitable with your target user.
